

3rd party identity card

Project acronym/name	<i>The Prosperancy Experiment</i>
Logo (if any)	 The logo for Alis Grave Nil consists of three blue, rounded rectangular shapes stacked vertically. The top shape contains the word 'Alis' in white, the middle shape contains 'Grave' in white, and the bottom shape contains 'Nil' in white.
Organisation name(s)	Alis Grave Nil

Objective, goal, use case

Alis Grave Nil is dedicated to advancing the 6G and AR/Metaverse industry through innovative solutions that address the critical need for performance transparency and dispute resolution. The app, we intend to build on the Prosperancy Protocol, will offer real-time performance monitoring, detailed data analysis, and efficient dispute resolution tools. By empowering users and service providers, we aim to create a transparent and accountable ecosystem that fosters trust and innovation. Our collaboration with the 6G Sandbox consortium has been instrumental in achieving our goals, and we are committed to further developing our solution to meet the highest standards of performance and reliability. With a distinct competitive advantage, versatile hybrid business model and a clear path to market, we are poised to make a significant impact in the industry.

Concept, approach

The Prosperancy Protocol is an open-source protocol designed to enhance performance transparency and facilitate dispute resolution in the AR/Metaverse industry. The app is going to integrate this protocol to provide real-time warnings and detailed performance reports, helping users identify issues related to internet speed and third-party services. Key features include:

- Real-time Performance Monitoring: Alerts users to potential issues affecting AR/Metaverse services.

Data Storage: Saves performance data separately, allowing for detailed analysis and fault assignment.

Dispute Resolution: Provides tools for quick out-of-court settlements, leveraging stored data to resolve consumer disputes efficiently.

User Empowerment: Enables small AR service providers to maintain high service standards and protect their reputation.

By embedding the Prosperancy Protocol, the app is going to aim at creating a transparent and accountable ecosystem, fostering trust and innovation within the 6G and AR/Metaverse industry

Results (testing, validation) and Impact

Tell us what results you obtained and how...

After extensive testing we have reached TRL 6 of the Prosperancy Protocol, allowing us to create a detailed Mediator's Guidelines and obtain feedback from potential users

Tell us what you think is the impact of the results...

For ourselves it is an important step in creating a vibrant dispute resolution product, supporting the bDual Transition. We are proud to have reached TRL 6 with a design that is environmentally friendly and easy to use.
